

STORAGE CONDITIONS AND HANDLING

All our cardboards are natural products that may react to climatic conditions. For optimal results and to ensure our product's properties, we recommend following these guidelines for storage and processing:

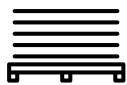

- Storage areas should be clean, dry and well-ventilated

- Room temperature 18 – 22°C (64 – 72 °F)
- Relative humidity level 50 – 55 %

- Leave in original packaging for 48 hours in the production hall before processing

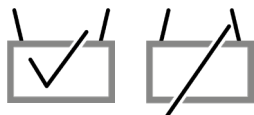

- Storage in original packing is recommended
- No direct sunlight
- No high temperature or humidity changes
- Store flat in horizontal position

- It is recommended to use the material within one year of date of production

- White cotton gloves or clean dry hands are recommended to avoid fingerprints and minimise the transfer of oils, dirt and moisture

- For optimum suspension, it is important to ensure that the installation be well supported to avoid bending

- Production waste and printed end products are 100 % recyclable as paper waste
